Professional Summary:

Highly motivated and experienced AI Engineer with 5+ years of experience in developing and deploying scalable machine learning models. Proven expertise in Natural Language Processing (NLP), Deep Learning, and collaboration with cross-functional teams. Proficient in Python and ML frameworks like TensorFlow and PyTorch.

Relevant Skills:

* Programming languages: Python, Java

* ML frameworks: TensorFlow, PyTorch, Hugging Face Transformers

* NLP techniques: Text analysis, sentiment analysis, named entity recognition

* Deep Learning: CNN, RNN, LSTM

* Containerization: Docker

* APIs: REST APIs

* Cloud platforms: AWS, GCP

Work Experience:

* **Senior AI Engineer**, ABC Company (2018-Present)
  + Built and deployed scalable machine learning models using TensorFlow and PyTorch

+ Developed NLP pipelines for document analysis and text classification

+ Collaborated with cross-functional teams to integrate AI models with existing systems

+ Implemented Hugging Face Transformers for text classification and language modeling tasks

* **AI Engineer**, DEF Startups (2015-2018)

+ Worked on developing and deploying machine learning models using scikit-learn and TensorFlow

+ Implemented NLP techniques for text analysis and sentiment analysis

+ Participated in designing and implementing REST APIs for model inference

Education:

* **Master of Science in Computer Science**, XYZ University (2015)

+ Coursework: Machine Learning, Deep Learning, NLP, Computer Vision

Certifications:

* **Certified Data Scientist**, Data Science Council of America (2018)

* **Certified AI Engineer**, International Association of AI Engineers (2020)

Note: This is a sample resume, please make sure to customize it to fit your own experiences and qualifications. Also, proofread multiple times for any grammar or formatting errors before submitting it.
